Shamli, Uttar Pradesh, India | +91 9149159993 | ujjavalbhardwaj6@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFILE SUMMARY

Data Analyst with hands-on project experience in Power BI, MySQL, Excel, and Python, skilled in transforming raw data into actionable dashboards and business insights. Proficient in data cleaning, exploratory data analysis, KPI reporting, and data visualization, with a strong ability to analyze large datasets and support data-driven decision making.

SKILLS

Analytical Tools: Power BI (DAX, Power Query), Excel (VLOOKUP, XLOOKUP, Pivot Tables), Google Sheets

Programming: Python (Pandas, NumPy), SQL

Databases: MySQL, PostgreSQL

AI & Automation: Prompt Engineering, LLM Evaluation, GPT-4, Claude, Gemini

Concepts: ETL, Data Cleaning, Data Modeling, EDA, Statistical Analysis, KPI Reporting, Data Visualization

Soft Skills: Communication, Data Storytelling, Critical Thinking, Collaboration, Problem-Solving, Attention to Detail

EXPERIENCE

Soul AI – AI Evaluator (Freelancer)

Remote | Feb 2025 – Aug 2025

- Evaluated LLM responses across 10+ quality dimensions (truthfulness, factual correctness, tool usage, reasoning, safety), assigning structured ratings and writing clear justifications for model behavior.
- Compared outputs from multiple AI models (GPT-4, Claude, Gemini) for identical prompts, identifying failure patterns and improvement opportunities to help teams refine prompts, policies, and overall model behaviour.
- Maintained consistent evaluation standards across a high-volume review pipeline, effectively functioning as a data quality analyst for AI-generated content at scale.

PROJECTS

AI Economy – Startup, Funding & Job Market Analysis [Power BI | Excel | Market Research] [Live](#) | [GitHub Repo](#)

- Analyzed 45,525 records across 3 datasets (500 startups, 25 funding deals, 30,000 jobs), finding AI has the lowest capital efficiency (7.9x) among 8 industries vs E-Commerce's 27% higher ROI.
- Found 60% of \$10.7B in 2024–25 global funding bypassed AI; India averaged \$745M per deal vs USA's \$403M – contradicting common assumptions about capital flows.
- Projected Transportation to lose 444K jobs while IT gains 512K by 2030, flagging 4,437 declining roles across 8 industries and 5 global regions.

Customer Shopping Behavior Analysis [SQL | Python | Power BI]

[GitHub Repo](#)

- Discovered discounts are margin-negative — promo customers averaged \$59.28 vs. \$60.13 for non-promo, yet Hat, Sneakers, and Coat are discounted on nearly every other sale (50%, 49.7%, 49.1% discount rates), flagging a pricing strategy misalignment.
- Found that 80% of customers (3,116/3,900) are Loyal buyers yet only 27.6% are subscribed — identifying the biggest monetization gap in the entire dataset and surfacing a high-impact retention opportunity.
- Revealed the gender revenue gap (\$157K male vs. \$75K female) is a volume problem, not behavioral — avg spend per order is nearly identical (\$59.54 vs. \$60.25), reframing the fix as customer acquisition rather than pricing strategy.

Vrinda Store Sales Performance Analysis [Excel | Power BI | Dashboard]

[GitHub Repo](#)

- Analyzed FY 2024–25 sales data in Excel to summarize key KPIs, including Rs.21.18 Cr total revenue, 32,047 total orders, and 89.3% delivery success rate for investor-ready reporting.
- Built an interactive dashboard highlighting the core customer segment (women aged 30–50 with 64% revenue share), channel contribution, and cancellation trends to support stakeholder decision-making.
- Identified strategic insights such as high dependence on Amazon and top 3 channels (80% of revenue), plus growth opportunities in North India and men's wear, informing a roadmap to Rs.25 Cr+ revenue.

EDUCATION

Bachelor of Computer Applications (BCA)

Aug 2019 – Oct 2022

Chaudhary Charan Singh University, Uttar Pradesh

Data Analytics Training – Excel, SQL, Power BI, Python

Aug 2023 – Nov 2024

Ducat Institute, Noida

CERTIFICATIONS

- Google Data Analytics Professional Certificate – [Google \(Coursera\)](#)
- Data Analysis with Python – [Cognitive Class](#)
- Problem-Solving Techniques – [LinkedIn Learning](#)
- Power BI Essential Training – [LinkedIn Learning](#)
